

SERENGETI
MIGRATION CAMP

Elewana Northern Circuit Tanzania

LOCATION

Tucked away in the vast plains, the Serengeti Migration Camp is located at the starting point of one of the world's great wonders - The Migration. Its landscape, originally formed by volcanic activity, has been sculptured by the ever changing climate and now varies from open grass plains in the south, savannah grasslands with scattered acacia trees in the centre, hilly wooden grassland in the north to extensive woodland and black clay plains to the west.
